Notes relative to speechwork sessions - 101408

This document contains notes I took at the beginning of *Speech pure rehabilitation II* for each of my sessions with speech therapists II and III.

I noted down before and after the sessions points such as :

- too high speech speed
- unclear speech sounds
- need to vocalize less strongly the last syllable of a word than the rest of that word
- efficiency of certain expressions for tongue flexibilization
- openness of the mouth required for the different speech sounds
- ...
