General presentation on my rehabilitation

I decided to have February, 19th as a deadline.

This decision resulted in :

- *higher intensity of rehabilitation work*
- *more intuitions. These were or were not right, but at least I had them.*

Questions regarding my rehabilitation case

- Ideas on speech sounds “st”, “ch” and “j”.
 - ➔ Request for professional comments from my speech therapist.
- Presentation on “speech sounds amplitude”.
 - ➔ Request for professional comments.
- In order to speak more slowly, I follow the rhythm of a metronome while reading out loud.
 - ➔ Request for professional comments.

State of my speech

- + : I separate speech sounds more clearly.
- - : I go on having problems to pronounce “ch” and “j”
 - ➔ Request for professional comments.

I refer to 3 pieces I prepared for my rehabilitation :

1. “Speech pure rehabilitation” planning (days of rehabilitation execution)
2. “st”, “ch” and “j” expressions and sentences
3. Exercices on “speech sounds amplitude”
